

Infrastructure Layer

Programmable networks, datacenter transport, TEEs

RDMA over Optics (Part III)

Confidential AI (Part III)

DPU
policy, telemetry, I/O

deployment constraints / compute demand

Protocol Layer

QKD post-processing, PQC algorithms (KEMs/signatures)

QKD Post-Processing (Part I)

PQC Algorithms (Part II)

DPU execution
QKD/PQC offload

device outputs / protocol requirements

Device Layer

Photonic sources, physical channel, quantum states

Integrated Photonic Sources (Part I)
